

## User Guide: Converting Excel graphs to TIF for publication (PC)

1. In Excel, right click the empty corner of your chart and select **Copy**

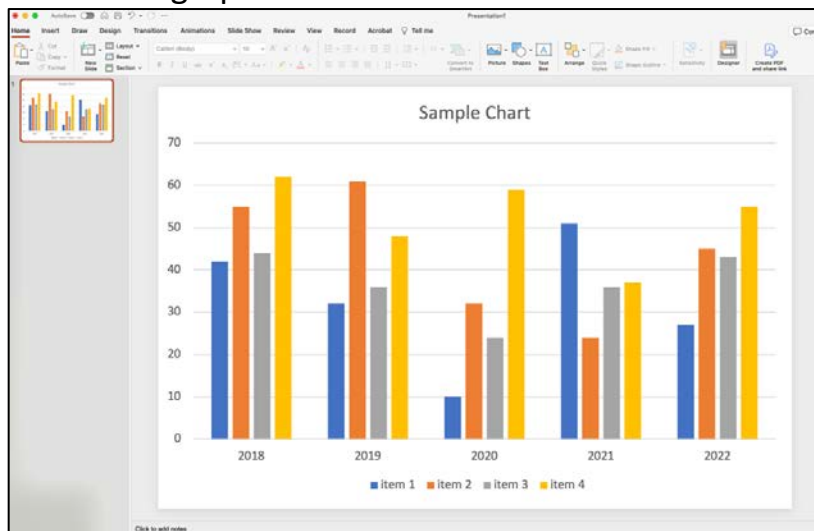

1. Open PowerPoint and create a new document
2. Navigate to the **Design** tab
3. Select **Slide Size** and then click **Custom Slide Size...**
4. In the dialog box labeled "Slides sized for", select **Custom** from the drop-down menu and then set the page size to your desired dimensions, and hit **OK**
  - a. If a pop-up window appears asking if you want to scale content down, select **Maximize**

## User Guide: Converting Excel graphs to TIF for publication (PC)

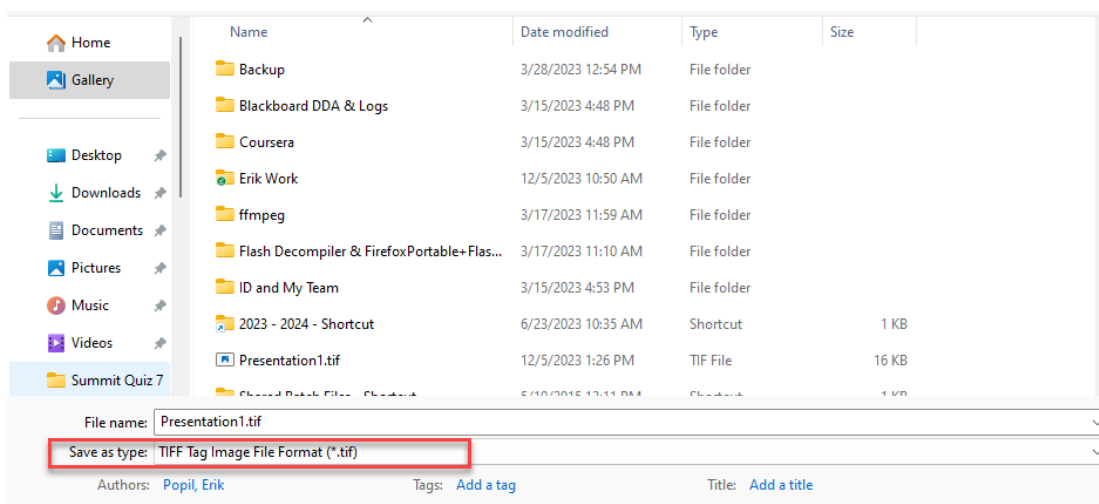

- Paste the Excel graph into the PowerPoint document. Resize as needed to fill the slide

- Navigate to **File > Export**
- Select **Change File Type**
- Choose **Save As**

- In the drop-down menu at the bottom of the dialog box next to “Save as type”, change the selection to “TIFF Tag Image File Format (\*.tif)”
  - Side note, TIF and TIFF are interchangeable, similar to JPEG and JPG

- PowerPoint will save the slide as a TIF in your Documents folder by default. You can change the location of where you save the file in the previous step.

This file is ready to send to the journal.
